Summary

Motivated and versatile software developer with five years of professional experience in mobile and web development, and a background in QA and hobbyist coding. Passionate about building scalable, high-quality applications and staying on top of emerging tech, including AI. Proven track record in Agile Scrum environments, working closely with cross-functional teams. Continuously improving skills, including regularly participating in the FlutterMTL community and developing personal projects. Currently seeking a new opportunity within a growth- and innovation-focused organization.

Professional Experience

Runes Technologies Inc. (Software Developer)
- Solo developer on two Flutter applications being used by the MELCC (Ministère de l'Environnement) with our client Attestra.
- Developed new features, fixed bugs, and maintained the CI/CD of the applications
- Participated in an Agile Scrum environment (ceremonies, planning, sprints, code reviews).
- Collaborated with QA, project managers, and backend/web developers.
- Integrated RESTful APIs and implemented integration tests using Flutter's test driver.
- Managed CI/CD with Codemagic.
- Advanced use of GitLab (multiple branches, environment-based version control).
  Technical Skills : Flutter, Dart, Provider, RESTful API, GitLab, Codemagic, Android, iOS, Agile Scrum, Mobile development

---

Stack Labs Canada (Software Developer)
- Hired and trained by a Google Developer Expert for the Canadian branch of Stack Labs, a Google-recognized consultancy based in France.
- Became an expert with Dart and Flutter through building projects for clients including Aerial.AI (Peace of Mind app) and Attestra (Traces Quebec app)
- Managed complex state logic using Provider in client-facing apps
- Coded complex stack-based navigation
  Technical Skills : Flutter, Dart, Provider, Stack Navigator, Clean Architecture

---

ShipHaul Logistics Inc. (Web Developer)
- Fast-paced startup environment; built web app for the shipping & logistics industry
- Frontend development with TypeScript and React; backend with Firebase
- Implemented Firestore, Cloud Functions, and Authentication
- Became comfortable working remotely in a small team with autonomy and active collaboration.
  Technical Skills : TypeScript, React, Firebase (Firestore, Cloud Functions, Authentication), Git, remote work with a small team

---

Keywords Studios (QA Lead)
- Tested various AAA video games across multiple platforms and consoles
- Wrote clear, detailed bug reports using JIRA, including clearly labeled and annotated pictures and videos
- Deepened my understanding of UX, QA, version control and development pipelines
  Technical Skills : JIRA, Confluence, gaming console dev kits, screen capture tools, MS Office, QA methodologies, version management

---

◆ **EA Mobile (QA Tester)**
- Tested mobile games on a wide range of Android and iOS devices
- Wrote precise bug reports in JIRA in collaboration with developers.
- Learned about APKs and IPAs
- Maintained rigorous documentation habits (annotated screenshots, detailed diagnostics)
- Deepened my understanding of UX, QA, version control and development pipelines
  Technical Skills : Android, iOS, JIRA, Confluence, mobile QA , MS Office

---

Spoken Languages	Education
English - fluent French - fluent Italian - Beginner	**Lighthouse Labs** (2021) Diploma Full-Stack Web Development **Vanier College** (2013) AEC Audio Recording Technology

---

Main Technologies
